- **Others** – Object-oriented programming, Figma, Git/GitHub/Gitlab, Vs Code.

Work Experience

Unique Computer Solution Agra
MERN Stack Developer Internship Training Jun-Dec 2023

During my six-month training, I led projects using HTML, CSS, JS, and React.js, managing code with Git for efficient collaboration. This experience honed my technical skills and developed valuable proficiencies in project management, teamwork, and adaptability.

Projects

Busy Buy   April 2024

- E-commerce platform with dynamic routing, authentication, and Fire store integration.
- Implemented features including cart management, order processing, and user authentication to enhance user experience.
- Leveraged Reacts component-based architecture to ensure a responsive design and seamless user functionalities.

Photofolio   March 2024

- Developed Photo Folio, a React-based photo album app for learning, enabling users to upload, organize, and share digital photos seamlessly
- Implemented fundamental React concepts including Functional Components, States, Hooks, and Conditional Rendering to enhance user experience.

Chat App   Nov 2023

- Implemented and deployed a real-time chat application with a modern, intuitive user interface, enabling seamless communication between users.
- Ensured responsiveness and optimized user experience across devices using HTML, CSS, JavaScript, and WebSocket for real-time data exchange.

Education

Bachelor of Technology in Computer Science and Engineering (CSE), 2020-24, AKTU, UP - INDIA
